Book Description

Publication Date: **April 18, 2012** | ISBN-10: **1430241675** | ISBN-13: **978-1430241676** | Edition: **1**

If you've done some Arduino tinkering and wondered how you could incorporate the Kinect—or the other book is for you. The authors of *Arduino and Kinect Projects* will show you how to create 10 amazing, creative projects that are simple to complex. You'll also find out how to incorporate Processing in your project design—a language very simple to learn.

The ten projects are carefully designed to build on your skills at every step. Starting with the Arduino and "Hello, World," the authors will take you through a diverse range of projects that showcase the huge range of what you can do when Kinect and Arduino are combined.

Book Description

Publication Date: February 3, 2012 | Series: Make: Books

This detailed, hands-on guide provides the technical and conceptual information you need to build cool applications with Microsoft's Kinect, the amazing motion-sensing device that enables computers to see. Through half a dozen meaty projects, you'll learn how to create gestural interfaces for software, use motion capture for easy 3D character animation, 3D scanning for custom fabrication, and many other applications.

Perfect for hobbyists, makers, artists, and gamers, Making Things See shows you how to build every project with inexpensive off-the-shelf components, including the open source Processing programming language and the Arduino microcontroller. You'll learn basic skills that will enable
