NOTES:

Software Enhancements:

- 1) Software will only reduce the number of failed prints done per day and not for prints done on previous days and no more than one reduction without an override. This will allow level one operators the ability to do one reprint in case of printer error (without supervisor) approval and also eliminate their ability to get around the Print One/Reprint security settings by reducing the number of reprints to 0 before printing.
- 2) ID verified field should be required to be set to Y before printing is allowed.
- 3) An ID cannot be printed if it doesn't have a picture.
- 4) Fix "Cards Printed" feature to increment accurately

SUBTOTAL	\$14,456.25
SALES TAX	\$1,156.50
FREIGHT	\$175.00

These enhancements will require custom programming which is estimated to cost approximately \$1750 for all three issues. This price includes the custom programming along with the script which will be sent for installation. If you will require assistance to install the script, there would be a charge of \$125/hr.
