Historical Connections Bundle

PRINT VERSION

Item #: 1394

~~\$65.85~~-\$10.90 OFF

\$54.95

AIMS curriculum is copyrighted for one user.

Please purchase one item for each user. For digital versions (when available), you will receive a single download and have permission to share with the number you ordered.

This bundle contains all 3 of our Historical Connections books:

- Historical Connections Vol. I
 - Historical Connections Vol. II
 - Historical Connections Vol. III
- Grades 7-12

Did you know that Isaac Newton was inspired to study mathematics after a fight with the school bully, or that Maria Agnesi solved problems in her sleep? Sophie Germain worked on mathematics secretly by candlelight, and Blaise Pascal made one of his greatest discoveries because of a toothache. You might be surprised to learn that Albert Einstein didn't do very well in school and that Descartes got a great idea by watching a fly.

Behind every mathematical discovery there is a story, often a fascinating story. Historical Connections in Mathematics explores this intriguing linkage between history and mathematics. This rich collection of resources includes biographical information, famous quotations, and interesting anecdotes from the lives of 30 mathematicians (ten in each volume).

Each chapter includes four to six ready-to-use classroom activities related to the work of the featured mathematician. These reproducible activity sheets range from problem-solving exercise to hands-on learning
