Unless otherwise shown, on "FOB Shipping Point" transactions, CONTRACTOR shall arrange for lowest cost transportation, prepay and add freight to invoice and furnish supporting freight bills if the amount exceeds \$50.00. On "FOB Shipping Point" transactions, should any shipments under this purchase order be received by LRCCD in a damaged condition and any related freight loss and damage claims filed against the carrier or carriers be wholly or partially declined with the inference that damage was the result of the act of the shipper such as inadequate packaging or loading or some inherent defect in the equipment and/or material, CONTRACTOR on request of LRCCD shall at CONTRACTOR's own expense assist LRCCD in establishing carrier liability by supplying evidence that the equipment and/or materials was properly constructed, manufactured, packaged, and secured to withstand normal transportation conditions. 14. **TERMINATION:** LRCCD may terminate this agreement and be relieved of the payment of any consideration to CONTRACTOR should CONTRACTOR fail to perform the covenants herein contained at the time and in the manner herein provided. In the event of such termination LRCCD may proceed with the work in any manner deemed proper by LRCCD. The cost to LRCCD shall be deducted from any sum due the CONTRACTOR under this agreement and the balance if any, shall be paid the CONTRACTOR upon demand.

Policy limits for each shall be at least \$1,000,000 AND \$3,000,000 AGGREGATE for bodily injury, personal injury and property damage. Any combination of General Liability and Excess Coverage can be combined to meet the Aggregate. LRCCD shall be named as an additional insured on CONTRACTOR's policies. The CONTRACTOR shall provide a certificate of insurance and required endorsements to comply with this section at least 15 days prior to commencement of work under this contract. 22. **WARRANTY:** CONTRACTOR expressly warrants that all materials, goods, equipment, services, and/or labor shall conform to the requirements set forth or incorporated into this order and any applicable industry standards or requirements, shall be merchantable and free from defects in workmanship, materials and/or design (including latent defects), and shall perform as specified. CONTRACTOR further warrants that all materials, goods, equipment, services, and/or labor will be fit and sufficient for the particular purposes intended by LRCCD. ## Electric Utility Vehicle Purchase Justification

### Polaris GEM EL (Preferred Vehicle)

- The Polaris GEM model best meets the need of the EDC campus.
- The cabin space provides easy access for both regular and plus size employees, reducing the risk of tweaked backs or other joints.
- The front wheels extend in front of the cabin space which provides for a smoother ride and better handling capabilities.
- The 72volt batteries will provide the extra “kick” needed to navigate the hills that are around the EDC campus.
- The larger batteries will all allow for longer use times between charges.
- The Polaris only requires a 110 outlet for charging.
- The 12 inch tires are easier to replace and provide for better stability and handling by drivers.
- The longer wheel base also will help with handling of the vehicle around the campus.
- The ladder rack and fold down stake back adds to the GEM’s functionality.
- Pricing is only \$270 more than the Taylor Dunn model.

### Taylor Dunn B248

- The cabin is too small for plus size employees.
- The front wheels are under the cabin seat resulting in a jerkier, bumpier ride, poorer handling capabilities and increased risk of accident when navigating the hills around the EDC campus.
- Less battery capacity – 48 volt.
- The 8 inch tires are harder to replace and not as stable for the terrain.
- Replacement parts are very expensive.
- \$270 less than Polaris GEM

### Club Car Carryall 710 LSV

- Less battery capacity – 48 volt.
- The 8 inch tires are harder to replace and not as stable for the terrain.
- The college is not looking for a heavy-duty work horse. It needs a vehicle that aligns better with transporting custodial supplies, campus orders and set-ups.
- Cost is \$1,795.10 more than the Polaris GEM.

### HARDWORKING HERO: JOB 610

*Road Runner.* Why use a fuel-guzzler just to pick up a part from a supply house, shuttle a worker from site to site, or run errands when a street-legal Carryall 510 LSV are so much less expensive? The zero-emission electric vehicles cost just pennies a day to operate, make parking a breeze and get about 30 miles to a full charge.

### HARDWORKING HERO: JOB 555

*Green power.* Busy downtown areas can be a challenge. Congestion, pollution and limited parking can create issues for parking enforcement. The Carryall 710 street-legal LSV overcomes these issues and for just pennies a day.
