On "FOB Shipping Point" transactions, should any shipments under this purchase order be received by LRCCD in a damaged condition and any related freight loss and damage claims filed against the carrier or carriers be wholly or partially declined with the inference that damage was the result of the act of the shipper such as inadequate packaging or loading or some inherent defect in the equipment and/or material, CONTRACTOR on request of LRCCD shall at CONTRACTOR's own expense assist LRCCD in establishing carrier liability by supplying evidence that the equipment and/or materials was properly constructed, manufactured, packaged, and secured to withstand normal transportation conditions. 14. **TERMINATION:** LRCCD may terminate this agreement and be relieved of the payment of any consideration to CONTRACTOR should CONTRACTOR fail to perform the covenants herein contained at the time and in the manner herein provided. In the event of such termination LRCCD may proceed with the work in any manner deemed proper by LRCCD. The cost to LRCCD shall be deducted from any sum due the CONTRACTOR under this agreement and the balance if any, shall be paid the CONTRACTOR upon demand.
15. **ASSIGNMENT:** Without the written consent of LRCCD, this agreement is not assignable by CONTRACTOR either in whole or in part.
16. **PUBLIC WORKS PROJECTS:** CONTRACTOR must comply with Public Contract Code.

Policy limits for each shall be at least \$1,000,000 AND \$3,000,000 AGGREGATE for bodily injury, personal injury and property damage. Any combination of General Liability and Excess Coverage can be combined to meet the Aggregate. LRCCD shall be named as an additional insured on CONTRACTOR's policies. The CONTRACTOR shall provide a certificate of insurance and required endorsements to comply with this section at least 15 days prior to commencement of work under this contract. The certificate shall state that LRCCD will be given 30 days notice of any material change or cancellation in coverage.

LRCCD shall not make any payments to CONTRACTOR unless CONTRACTOR holds the appropriate U.S. visa. CONTRACTOR is responsible for ensuring they are in possession of the appropriate visa.
22. **WARRANTY:** CONTRACTOR expressly warrants that all materials, goods, equipment, services, and/or labor shall conform to the requirements set forth or incorporated into this order and any applicable industry standards or requirements, shall be merchantable and free from defects in workmanship, materials and/or design (including latent defects), and shall perform as specified. CONTRACTOR further warrants that all materials, goods, equipment, services, and/or labor will be fit and sufficient for the particular purposes intended by LRCCD. Unless agreed upon otherwise between LRCCD and CONTRACTOR, the warranty period shall be the longer of: (a) any express warranty included in this service agreement; (b) one year after the materials, goods, equipment, services, and/or labor are accepted by LRCCD; or (c) any warranty period provided under any applicable California law.

The Ultimaker 3 Extended is the first ever dual extrusion printer produced by Ultimaker. Ultimaker has built a loyal following over the past several years because they make exceptionally high quality printers which have a reputation for reliability and dependability. The new Ultimaker 3 Extended is the evolution of all of Ultimaker's 3D printing efforts. This printer comes standard with an automatic bed leveling system, which makes printing more effortless than ever before.

#### Ultimaker 3 - Highlights & Review

## Innovative Print Cores

The Ultimaker 3 Extended comes with swappable "print cores" (aka hotends) so that you can experience greater dual extrusion reliability by utilizing specific cores and nozzles for different material types. Currently, 2 cores are available - AA and BB. The AA core is the core designed for standard materials such as PLA (<http://www.matterhackers.com/store/3d-printer-filament/pla>) filament, ABS (<http://www.matterhackers.com/s/store?q=ABS>) filament, etc. The BB core is designed for use with dissolvable support materials such as PVA (<http://www.matterhackers.com/s/store?q=PVA%20-porous%20-lulzbot%20-lay%20-leapfrog>) and HIPS (<http://www.matterhackers.com/s/store?q=HIPS%20-buildtak%20-lulzbot%20-lay%20-makerbot%20-leapfrog>). The AA and BB cores feature nozzles which have customized geometry so that they are optimized for different material types. That means that you can expect greater reliability and fewer failed prints.

## Dependable Dual Extrusion

Ultimaker's innovative dual extrusion system allows you to print with two materials at once so that you can utilize multiple colors or support materials such as HIPS. Dissolvable support materials like PVA allow you to create complex prints without using breakaway supports. The dual extruder on the Ultimaker 3 Extended comes with a unique auto nozzle-lifting system which picks up your secondary print nozzle when it is not in use. This allows the user to achieve cleaner prints without the stringing commonly associated with dual extrusion printers.
