14. **TERMINATION:** LRCCD may terminate this agreement and be relieved of the payment of any consideration to CONTRACTOR should CONTRACTOR fail to perform the covenants herein contained at the time and in the manner herein provided. In the event of such termination LRCCD may proceed with the work in any manner deemed proper by LRCCD. The cost to LRCCD shall be deducted from any sum due the CONTRACTOR under this agreement and the balance if any, shall be paid the CONTRACTOR upon demand.

The Ultimaker 3 Extended is the first ever dual extrusion printer produced by Ultimaker. Ultimaker has built a loyal following over the past several years because they make exceptionally high quality printers which have a reputation for reliability and dependability. The new Ultimaker 3 Extended is the evolution of all of Ultimaker's 3D printing efforts. This printer comes standard with an automatic bed leveling system, which makes printing more effortless than ever before.

## Innovative Print Cores

The Ultimaker 3 Extended comes with swappable "print cores" (aka hotends) so that you can experience greater dual extrusion reliability by utilizing specific cores and nozzles for different material types. Currently, 2 cores are available - AA and BB. The AA core is the core designed for standard materials such as PLA (<http://www.matterhackers.com/store/3d-printer-filament/pla>) filament, ABS (<http://www.matterhackers.com/s/store?q=ABS>) filament, etc. The BB core is designed for use with dissolvable support materials such as PVA (<http://www.matterhackers.com/s/store?q=PVA%20porous%20lulzbot%20lay%20leapfrog>) and HIPS (<http://www.matterhackers.com/s/store?q=HIPS%20builtak%20lulzbot%20lay%20makerbot%20leapfrog>). The AA and BB cores feature nozzles which have customized geometry so that they are optimized for different material types. That means that you can expect greater reliability and fewer failed prints.

## Dependable Dual Extrusion

Ultimaker's innovative dual extrusion system allows you to print with two materials at once so that you can utilize multiple colors or support materials such as HIPS. Dissolvable support materials like PVA allow you to create complex prints without using breakaway supports. The dual extruder on the Ultimaker 3 Extended comes with a unique auto nozzle-lifting system which picks up your secondary print nozzle when it is not in use. This allows the user to achieve cleaner prints without the stringing commonly associated with dual extrusion printers.
