LOS RIOS COMMUNITY COLLEGE DISTRICT
Sole Source Purchase Justification

Date: 4/13/17

To: LRCCD Purchasing Dept

From: FLC Psychology Dept/Zack Dowell

Subject: Justification Requirements for Sole-Source Procurements

Requisition No. 0001009369

Vendor Name: OPEN BCI, Inc.

SOLE-SOURCE ITEMS

Sole-source items are those items which perform a certain function for which no other items are known to exist. In a highly technological society, either patents or a clearly superior product may perform a function that limits you to a sole source. If it is economically advantageous and critical for its use in conjunction with instruction or operation to use such a product, then it is suggested that you do so. Justification for specifying such items is extremely important and should be clearly stipulated. Sole-source situations can be minimized by your using performance specifications and request for quotes (RFQ's).

Competitive bidding is not a thoroughly suitable purchase method for sole-source items. It is best to advertise for bids on an "approved equal" basis; if no bids are offered, proceed to negotiate a fair and reasonable price with the sole source. When only one bid is received, you may have a sole-source situation if you believe that no other competitive sources are available.

Sole-source acquisitions must be justified in sufficient detail to explain the basis for suspending the usual competitive procurement process.

The following represents factors that might justify sole source:

1. What capability does the proposed vendor have that is critical to the specific effort and make the vendor clearly unique compared to other vendors in the same general field?
2. What prior experience of a highly specialized nature does the proposed vendor have that is vital to the proposed effort?
3. What facilities, staffing, and/or equipment does the proposed vendor have that are specialized and vital to the commodities or services required?
4. Does the proposed vendor have a substantial investment that would have to be duplicated at the District's expense by another vendor entering the field?
5. If schedules are involved, why are they critical and why can the proposed vendor best meet them?

The enclosed form should be completed and submitted with your Requisition for justification.

R&D Kit (16-channel) — Cyton, Daisy, & Accessories

Current Stock: 18

\$ 999.99 [Add to Cart!](#)

Product Overview:

This all-in-one, comprehensive kit contains everything you need to get up and running with a 16-channel, OpenBCI biosensing suite.

The OpenBCI 32bit Board and OpenBCI Daisy Module (which plugs into the OpenBCI 32bit Board) can be used to sample brain activity (EEG), muscle activity (EMG), and heart activity (EKG). The system communicates wirelessly to a computer via the OpenBCI programmable USB dongle, which is based on the *RFDuino* radio module. It can also communicate wirelessly to any mobile device or tablet compatible with Bluetooth Low Energy (BLE).

If you are only interested in using the OpenBCI system for research and don't care about the hardware, don't fret! The board and dongle come pre-loaded with the latest firmware, making OpenBCI accessible to researchers and developers with little to no hardware experience. OpenBCI boards have a growing list of data output formats, making them compatible with an expanding collection of existing biofeedback applications and tools.

This kit **does not** come with EEG conductive paste. We recommend using industry-standard EEG electrode paste to adhere the electrodes to the scalp and body. Some EEG paste options include:

- Ten20 Paste EEG Conductive Paste
- ELEFIX Conductive EEG Paste
