14. **TERMINATION:** LRCCD may terminate this agreement and be relieved of the payment of any consideration to CONTRACTOR should CONTRACTOR fail to perform the covenants herein contained at the time and in the manner herein provided. In the event of such termination LRCCD may proceed with the work in any manner deemed proper by LRCCD. The cost to LRCCD shall be deducted from any sum due the CONTRACTOR under this agreement and the balance if any, shall be paid the CONTRACTOR upon demand.

## OVERVIEW

- Hand-Selected Steel
- Thousands of Measurements
- Each Note Thinned Individually
- Range: C2 - F3
- Can Fit with Low Frequency Modifiers
- Painted Finish

## ITEM DETAILS

Solid Hoop Pans are Panyard's premiere line of instruments. Everything about these instruments says quality: the steel used is carefully hand-selected, thousands of measurements are painstakingly taken throughout the crafting process, and each note is individually hammered to its own thickness. Once initially hammered, the pan is then analyzed by experts who provide information on how to make that specific pan sound the best it possibly can.

Bass Pans are full-sized, 55-gallon oil drums, and complete the low end of the steel drum choir. Each pan has three notes, giving this instrument a range of C2 - F3. Three of the pans can be suspended on Panyard Bass Stands, while the other three can be hung within easy reach with Panyard High Bass Stands (stands not included). The top three pans can also be fitted with Low Frequency Modifiers, which negate some of the natural overtones produced by the column of air within the drum itself. The 6-drum version of this instrument gives you less equipment to haul around, while the 8-drum arrangement provides an extended range. The painted finish gives visual clarity to the pitches, and will not become impossible to read under stage lights.

## Description

Our Six Bass combined with our new High Bass Stands provides the perfect Bass for any steelband ensemble. With the rich warm sound and perfect pitch clarity provided by our Low Frequency Modifiers(TM), you will be astonished at the size of the band you can drive with this instrument.

Our High Bass stands allow us to configure the Six Bass in a similar layout as the 4ths & 5ths Lead Pan. Combine this with the fact that the note surfaces are closer together than ever, and suddenly playing the bass pans is a breeze!
