Subject: RE: Requisition for the Harris Center PC refresh
Date: Thursday, March 05, 2020 4:08:12 PM
Attachments: [image002.png](#)

- Is the 8 GB RAM listed separately an additional 8 GB to get us to a total of 16 GB for each machine, or is this just the base RAM? 16GB.

Great.

- In talking with Lisa, she feels ticket office needs at least two laptops for when they are working in the lobby. She said a Chromebook would be fine, but I suspect we should just get full laptops. The same as what you specified for Sandy should be fine. I agree with you, do you want two laptops or three?

Three.

- On the existing requisition, item 6-1, it looks like there was a mix-up; description starts out as a laptop, but then merges into a 27" monitor(?). This was probably just a typo. Yes, a typo. Thanks for catching.

No Comment... ;)

- Overlooked? We have a few folks (Jared, Kathleen Leavitt, new Arts Ed person Anita Menon, likely an additional marketing consultant) who currently (or will shortly) remote in. Should we add some extra machines for them as well? Also, there is one additional machine in the marketing bullpen (PAC-2060-MRKT2) that needs to be upgraded as well. Perhaps we should add 5 more machines to the order? We could add 4 mini computers like the ones at the ticket windows so they take up less space. Where will they go?

Not too critical where they go, as long as they are secured – except you're going to need network connections, so maybe they get distributed or a local mini-switch to support them?

OK. Thanks for clarifying all of this. I'm OK going with the i5 for the value. Sorry for the trouble.

Loose ends:

- Is the 8 GB RAM listed separately an additional 8 GB to get us to a total of 16 GB for each machine, or is this just the base RAM? 16GB.
- In talking with Lisa, she feels ticket office needs at least two laptops for when they are working in the lobby. She said a Chromebook would be fine, but I suspect we should just get full laptops. The same as what you specified for Sandy should be fine. I agree with you, do you want two laptops or three?
- On the existing requisition, item 6-1, it looks like there was a mix-up; description starts out as a laptop, but then merges into a 27" monitor(?). This was probably just a typo. Yes, a typo. Thanks for catching.
- Overlooked? We have a few folks (Jared, Kathleen Leavitt, new Arts Ed person Anita Menon, likely an additional marketing consultant) who currently (or will shortly) remote in. Should we add some extra machines for them as well? Also, there is one additional machine in the marketing bullpen (PAC-2060-MRKT2) that needs to be upgraded as well. Perhaps we should add 5 more machines to the order? We could add 4 mini computers like the ones at the ticket windows so they take up less space. Where will they go?

Having had a chance to think this through, I will approve use of the budget string once a new req is built up with these adjustments...

Thanks for your patience...

Subject: FW: Requisition for the Harris Center PC refresh

Hey Dave, Joany is saying DO is harassing her because this requisition has been sitting out there for a while. I think you were curious of the price difference between the i7 and the i5 variants. So the i7 is listed at \$954.33 each and the i5 is \$768.35.

Here is a comparison of the i7 vs i5:

The screenshot shows a comparison between two Intel processors on the UserBenchmark website. On the left is the Intel Core i7-9700 (model BX80684I79700), priced at \$370, with 8 cores and 8 threads at 3.00 GHz, 65 W, and a release date of Q2 2019. It has a user rating of 58 and a speed rank of 11th / 1206. On the right is the Intel Core i5-9500 (model BX80684I59500), priced at \$370, with 6 cores and 6 threads at 3.00 GHz, 65 W, and a release date of Q2 2019. It has a user rating of 54 and a speed rank of 32nd / 1206. The i7-9700 is shown to be 6% faster in effective speed. The i7-9700 has a gaming score of 94%, a desktop score of 94%, and a workstation score of 83%. The i5-9500 has a gaming score of 89%, a desktop score of 89%, and a workstation score of 63%.

The i5 has a higher user rating because of its value. Usually the memory and the SSD are the most noticeable improvements to standard desktop performance. Do you want me to get a new quote with the i5 config, move forward with this order or cancel it all together?
